1. Attach the network cable to your computer and the wall jack.
2. Disable your wireless adapter.
3. Open web browser.
4. In the browser address bar, type in http://zagreg.gonzaga.edu (You may also enter 147.222.200.4)

**Network Registration:**

**ZagNet Access...**
Enter Authorization Credentials:

User Name: 
Password: 
Domain: GONZAGA.EDU

5. Once at the Zagreg site, enter your Gonzaga user name (ex: Jsmith3) and password. (Domain should be set as GONZAGA.EDU).
6. Review the ACCEPTABLE USE POLICY
7. Click “Accept” (by clicking accept you are agreeing to adhere to the policy guidelines in the ACCEPTABLE USE POLICY)
8. Now scroll down to the list of dorms and select the one you are assigned to.
9. Select DHCP, not static (unless otherwise instructed).
10. Scroll to the bottom of the screen and click “Commit”.
11. Congratulations! You can now select up to 5 registrations for your various devices. (e.g.: laptop, desktop, game consols, etc...). All wired internet devices are required to be registered.
12. Reboot your computer and you should now be connected to the network.
13. You may need to clear your browser’s “cache” if you are continually redirected to the Zagreg registration page.

Information Technology Services
GONZAGA UNIVERSITY
Get IT Connected Wireless

Windows Vista & 7

1. Click on the Start bubble and type Network and Sharing Center and press enter.
2. On the bottom of the window that opens, click Connect to a Network.
3. Select Gonzaga Community from the list of networks available and click "connect".
4. At the Network Authentication window enter your Gonzaga University’s User name & Password and select “OK”

Windows 8

1. From the metro interface move the mouse cursor to the upper right corner of the screen until the Charms Bar appears. Select Settings and then select WiFi.
2. Select Gonzaga Community from the list of networks available, ensure “Connect automatically” is checked, & and click “connect”.
3. At the Network Authentication window enter your Gonzaga University’s User name & Password and select “OK”
4. At the server identification window select “connect”

Macintosh

1. Click on the AirPort icon in the upper right corner.
2. Select the Gonzaga Community network entry from the drop-down list
3. In the window that appears, enter your Gonzaga login information.
4. In the user name box, enter your user name in the format: gonzaga\username.

If you would like to have your login information stored in order to avoid entering it every time you Connect to the wireless network, check the box labeled Remember password in my keychain.

NOTE: Users affiliated with the Law School will need to enter their user name in the format of: gonzlawusername.

Click Continue on the Verify Certificate window.

NOTE: To Always trust the Certificate, click the "Show Certificate" button and check the box next to "Always trust "securelogin.arubanetworks.com"", then click the "Continue" button.

Maintenance Note: After changing passwords on the Gonzaga (or gonzlaw) domain, or to correct mistyped credentials, you may have to delete the "Aruba Authentication" entry from your KeyChain. You may also have to select another wireless zone then switch back to Gonzaga Community thereby forcing the system to re-prompt you for your username and password.

Your login information will be stored by Windows for Connecting to the wireless network. If you remove the entry for Gonzaga Community from the Manage Wireless Networks list in the Network and Sharing Center, your login information will be gone and you will have to repeat steps above. Also, if your Gonzaga login password is changed, a dialog box will appear when Connecting to the wireless network where you can enter the new password.
